## Fabric Identity Card

OXYGEN

## OXYGEN

---

An iconic Lanificio F.lli Cerruti fabric for jackets, Oxygen is reborn with new patterns and refined colorways. Crafted from mouliné yarn that blends the lustre of silk with the softness of wool, it balances form, texture, and lightness. Woven in a hopsack construction, the fabric is three-dimensional, breathable, and full of depth. Even in its solid versions, the mouliné adds vibrancy and movement. Designed for versatile elegance, Oxygen transitions effortlessly from formal occasions to leisurewear and urban style. A modern interpretation of the classic jacket fabric, where material and function meet in perfect harmony.

---

**Fibre in Balance:** The elasticity of wool meets the brilliance of silk, creating a refined and enduring balance.

**Chromatic Vibration:** The mouliné yarn creates plays of light and colour with full tones and vibrant nuances, even in the solid versions.

**Smart Structure:** The hopsack construction provides tridimensionality and volume, resulting in a fabric that moves with the body, and maintains a polished appearance.

**Modern Versatility:** Designed to accompany every moment formal, informal, or leisure, this jacket blends style, functionality, and identity.

---

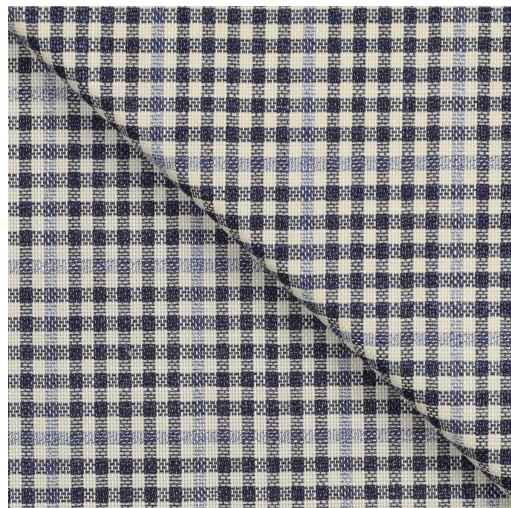

**A jacket fabric where essential lines and refined construction come together in a statement of timeless elegance**
