Fabric Identity Card

TRAVELISSIMO

TRAVELISSIMO

Travelissimo is more than a fabric, it is a way of moving through the world. Developed by Lanificio F.lli Cerruti, it reinterprets one of the mill's iconic fabrics through advanced research and innovative construction. At its core lies a dynamic high twist yarn, developed and spun in-house to enhance performance.

Crafted in a structured tropical weave, it combines lightness with remarkable resistance, offering a smart hand feel. Versatile, agile and naturally sophisticated, it is designed to move effortlessly from one destination to another. Exclusively made from RWS-certified wool fibres, Travelissimo expresses a conscious idea of luxury.

The true passport to style.

Water Resistant: Designed to repel light moisture, keeping the fabric protected and impeccable in changing conditions.

Breathable: An ultra-light open structure that enhances airflow, ensuring freshness and comfort even in warmer climates.

Stain Resistant: Engineered to resist everyday marks, preserving a clean and refined appearance throughout the day.

Creaseless: Advanced finishing reduces wrinkles, maintaining a sharp, polished look from travel to arrival.

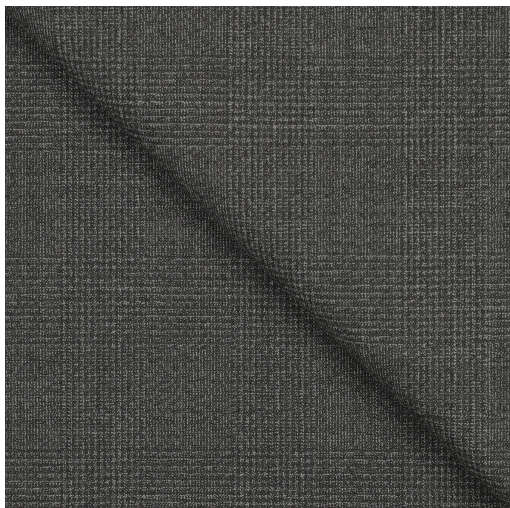

Natural Stretch: Crafted with naturally elastic fibres to provide ease of movement and comfort while retaining a tailored silhouette

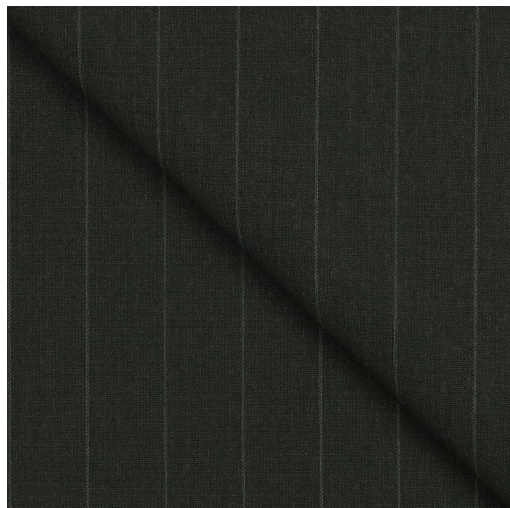

Performance that never stops.
